

INNOVATION. INTEGRATION. CONNECTION.

# WHAT SERVES YOU BEST?

## INNOVATION, EXPERTISE, AND PROS WHO PERFORM.

For more than a decade, the AMSconnect team has delivered best-in-class innovation-driven solutions. As the market leader, we are your single source for the entire suite of integrated services: audio video (A/V), information technology (IT), and security systems. With highly responsive service for communities, businesses, and homeowners, we develop networked systems that integrate all your environments. You get the whole universe of technology, all in one place. That's innovation at its best.

Whatever your needs, our fully licensed pros solve complex problems with knowledge based skills and in-depth experience. Whether it's customized A/V solutions and home automation, sophisticated IT operating environments, or security systems with analytics based technology, we innovate at the intersection of technology and integration.

## TRUSTED PERFORMANCE. ENDURING RELATIONSHIPS.

Locally owned and operated, with powerful financial stability, we're there when you need us. Guided by integrity and reliability, we have 19 professional technicians and installers, and 24/7 on-call techs to deliver service excellence. Trusted to perform, we forge relationships that endure. Know that, above all, your business means everything.

# THE FULL SUITE OF SERVICES AT YOUR COMMAND.

## AUTOMATION SYSTEMS

Home automation has reached a new level of sophistication. We'll customize everything you need — lighting, thermostat, TV, you name it — into one integrated network, programmed into one app. Better still, you have it all with the press of a button. State-of-the-art Control4 and Crestron control systems put you in charge.

## HOME CINEMA

Designed to surpass the ultimate movie theater, our installations surround you with the whole experience. Get superior video and sound quality, all in the comfort of your own home. We'll create a customized environment with everything from soundproofed wall treatments to fiber optic starlight ceilings. You imagine it, we'll make it happen.

## MUSIC SYSTEMS

Get the finest quality sound experience available. Your system can interface with your smartphone, so you can incorporate your favorite playlists from Spotify to Pandora, modified to your preferences. Even more, we'll extend your sound experience outdoors. Be it near the pool or near the fire pit, advanced systems heighten your outside listening pleasure.

## SHADING SOLUTIONS

With today's options tied to your home automation system, customize your entire home's window treatments. From sheer options to complete blackout shading, we'll offer preferences with the best energy-saving selections for peak times of the day. We'll connect everything so you can control all of it with the same integrated system.

## VIDEO SYSTEMS

We'll set up your system to play in any room, distributed throughout the house in different designated zones. Whether it's a slide show of family pictures or your favorite video, we'll make sure it works 100%. Giving you the best quality on the market.

## CAMERA SYSTEMS

Now more than ever, camera systems help deter crime because would-be offenders know they're being observed. We can watch the property both inside and out. In the event there is an incident, the evidence can be given to security or law enforcement to provide key back-up information.

### COMMERCIAL A/V SYSTEMS

Adept at scaling up technology, our team can develop A/V installations for a range of audience uses. We can design and configure a custom system for everything from board meetings, conference rooms, video conferencing, and video walls to educational, governmental, and retail applications. Even digital signage. Our pros will install a top-quality system that powers your presentation.

### CLOUD VIDEO MANAGEMENT

Today's camera systems can record with cloud management services that don't require hardware or continuing upgrades. With remote access, you have maximum convenience. Whether residential or commercial applications, the technology makes certain you enjoy superior performance.

### IT/NETWORK SYSTEMS

Internet connectivity enables new technology as never before. From Wifi to smart devices, and tablets to laptops and smart TV, the average home has 20 devices connected to its network. We offer heightened cybersecurity protection, giving you a robust, yet secure network that protects your data. Essential today are password management, encryption for secure data storage, and a multitude of next generation tools that help protect your network.

**ALARM MONITORING**

Once your commercial or residential system is installed, we'll monitor it 24/7. That includes security, fire, and life safety monitoring as well as environmental applications such as flood detection or gas leaks. Add customized temperature and humidity monitoring for wine rooms and special installations, and individual panic and medical alert devices. Everything runs with our back-up generator, assuring uninterrupted service.

**FIRE ALARMS**

Whether you need a commercial or residential fire alarm system, we'll tailor it exactly to your needs. These days, in addition to security, many insurance companies need certificates that verify fire alarms are installed and properly maintained.

**SERVICE MAINTENANCE AGREEMENTS**

Our service agreements include regular maintenance such as pre-arrival and post-departure checks. We routinely do inspections to ensure our equipment and systems work better and last longer. Preventive maintenance and regularly scheduled updates include software updates that keep it all operating at peak performance.

**HOA MAINTENANCE**

Similar in intention to other service maintenance agreements, our HOA maintenance includes gates, cameras, and other preventive protocols. All of which are designed to keep equipment running in optimum condition. Regular maintenance helps to avert more issues before they happen.

## SECURITY SYSTEMS

Security systems include customized and integrated solutions from electronic devices to physical and network configurations. Our highly qualified team designs, installs and maintains systems for community associations, businesses and homeowners as well. We endeavor to improve both performance and peace of mind.

## GATE SYSTEMS

From gate operators and barrier arms to commercial call boxes, you'll find the complete array of systems and equipment to protect your gated community. Reinforced by our battery back-up, systems — which provide continuous operation during power outages — our equipment uses advanced technology to deliver optimum functionality and secure protection.

## ACCESS SYSTEMS

We are experts at automating keyless access to buildings, gates and communities to augment security and track people's entries and exits. You can restrict entry and exit electronically according to day and time, and the systems log all activity. Transponders for gate access systems provide an added layer of security.

### VENDOR TRANSPONDER MANAGEMENT

These systems enable us to verify and monitor which vendors have access at gated communities. We can check and confirm credentials for licenses and insurances, managing who is permitted entry and exit. We can also easily reprogram a system when someone needs to be denied access. We design systems that safeguard communities and private residences.

### PERIMETER INTRUSION SYSTEMS

Perimeter intrusion systems are essential to add another security layer. Our fully licensed pros install systems with superb workmanship and quality control to optimize functionality and reliability. Protect your property or community from would-be thieves or trespassers.

### TELEPHONE SYSTEMS

With today's increased dependence on cellphones, fewer homes have telephone systems. However, a home system enables you to connect remotely to other locations, use an intercom system or answer your front gate and door. The voicemail system lends convenience when a cellphone is not available.
